# 5 Step Process

1 Fill in the “pre-brainstorming” form  
(OUT: guide to brainstorming)

2 Do brainstorming (OUT: cluster ideas)

3 Put clusters into a “flow” (logical sequence)

4 Choose open gambit (hook them fast with question/weird fact)

5 Structure your presentation

# Pre-Brainstorming Form

## Step 1 “pre-brainstorming” form

### 1A Point B

What's your goal?

Your audience is at **Point A** – likely on their phones and laptops. By the end, they should be at **Point B**, caring about what you said.

# Pre-Brainstorming Form

## Step 1

# “pre-brainstorming” form

## 1B Know Your Audience

Who are they? What do they already know?

What's in it for them (**WIIFY**)?

# Pre-Brainstorming Form

## Step 1

# “pre-brainstorming” form

## 1C External Factors

If your topic is “Why Pineapple Belongs on Pizza” and half the crowd is Italian, you’re in trouble.

What outside “stuff” affects your message?

# Pre-Brainstorming Form

## Step 1

# “pre-brainstorming” form

## 1D The Setting

You don't do the same presentation for a TED Talk and your grandma's birthday party. What's your goal?

Who's there? Where is it?  
What's the vibe?

# Pre-Brainstorming Form

## Step 1

# “pre-brainstorming” form

## Final Tip

Point B and **WIIFY** are spoken, not written. Because no one enjoys reading a slide full of text.

# Pre-Brainstorming Form

## Step 1 “pre-brainstorming” form

**Exercise**  
Complete a brainstorming form

## Step 2 Do brainstorming

2A Put ideas down freely

2B Cluster the ideas

2C Polish isolated ideas

# Step 2

## Do brainstorming

### 2A Put ideas down freely

**Dump Every Idea You've Got.**  
No filters. Just blurt them out.

**Use Your Right Brain**  
That's the creative side.

**Talk, Don't Type**  
In speech, right side is on. Writing?  
Congrats! Doing it wrong!

# Step 2

## Do brainstorming

### 2B Cluster ideas

Once you've got a mess of ideas, group the similar ones together. Patterns will start to emerge. Like magic.

## Step 2 Do brainstorming

### 2C Polish isolated ideas

Polish the Oddballs. Got a few ideas that don't fit anywhere? Keep them. They might be weird. They might be brilliant. Or both.

**LOGICAL FLOW**

## Step 3

Put clusters into a «flow»

### Pick 1-2 flow structures

Based on your style, audience interest, story, conference rules, and gut feeling.

**LOGICAL FLOW**

## Step 3

Put clusters into a «flow»

### Modular

Break it into clear sections. Great for stuff like annual reports, or if you just love neat boxes.

## Step 3

Put clusters into a «flow»

### Chronological

Tell it in order. Past → Present → Future. Simple. Classic. Like a time machine.

**LOGICAL FLOW**

## Step 3 Put clusters into a «flow»

### Physical

Sort by location. Useful if your topic involves geography or, I don't know, selling sandwiches around the world.

# LOGICAL FLOW

## Step 3 Put clusters into a «flow»

### Problem & Solution

Start with a problem (WIIFY = Why should they care?). Then hit them with your brilliant solution. Works great when people already know something's broken.

## Step 3 Put clusters into a «flow»

### Opportunity → Leverage

Show the potential first, then explain  
how your idea makes it happen.  
(Investor pitch 101)

**LOGICAL FLOW**

## Step 3 Put clusters into a «flow»

### Form → Function

Start with one main idea, then show all the ways it applies. (If you want to sound clever.)

**LOGICAL FLOW**

## Step 3

Put clusters into a «flow»

### Case Study

Tell a real story that proves your point.  
(Because people love a good story,  
even if they pretend they don't)

**LOGICAL FLOW**

## Step 3

Put clusters into a «flow»

**Compare → Contrast**

Show how your idea stacks up against the alternatives (Because people love a good competition).

## Step 3

### Put clusters into a «flow»

#### Matrix

Organize info in a clear, business-y way (Best if your audience wears suits).

**LOGICAL FLOW**

## Step 3

Put clusters into a «flow»

### Parallel Tracks

Use a table to compare multiple ideas side by side (Like explaining diseases using the same key points).

## Step 3

Put clusters into a «flow»

## Rhetorical Questions

Ask a big question upfront, then answer it piece by piece (Classic. Works every time).

**LOGICAL FLOW**

## Step 3 Put clusters into a «flow»

### Numerical

List key points or facts in a logical order (If nothing else works, numbers always do)

# OPEN GAMBIT

## Step 4

## Choose one open gambit

### Grab Their Attention (Before They Grab Their Phones)

Your opening matters. If you don't hook them in the first few seconds, good luck getting them back.

FACTOIDS  
ANACOCOTES

# OPEN GAMBIT

## Step 4

## Choose one open gambit

### Question

Ask something that makes them think (or at least keeps them from falling asleep).

Call hands-up with a rhetorical question, which is provocative & relevant to your audience interests.

# OPEN GAMBIT

## Step 4

## Choose one open gambit

### Factoid

Drop a surprising stat that ties into your message.

Little fact/statistics close to your call to action (Point B)

# OPEN GAMBIT

## Step 4

## Choose one open gambit

### Retrospective/Prospective

Show how things used to be, how they are now, or where they're going with your offering. (Basically, make them care about change).

# OPEN GAMBIT

## Step 4

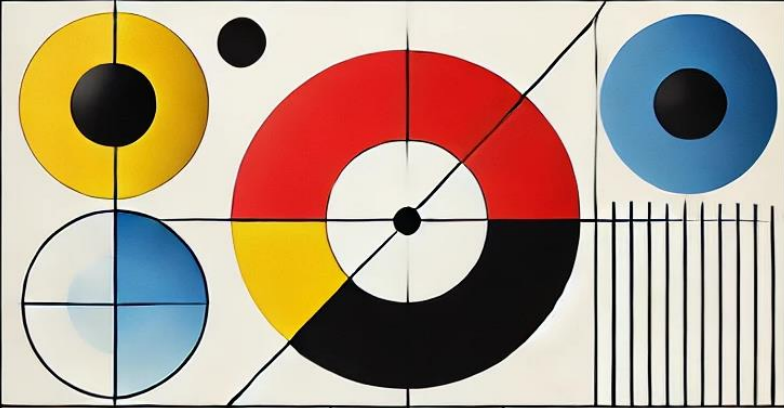

Choose one open gambit

### Anecdote

Tell a short, relatable story that creates empathy. Bonus points if it's funny. For example, a true life story about a concern shared by all audience

# STRUCTURE YOUR PRESENTATION

## Step 5

## Structure your presentation

5A Overview Slide (First 90 Seconds)

5B Body

5C Summarize

5D Last Words = Point B

# STRUCTURE YOUR PRESENTATION

## Step 5

## Structure your presentation

### 5A Overview Slide (First 90 Seconds Matter)

**Opening Gambit.** Hook them. Fast.

**Unique Selling Proposition (USP).** Say what you offer in one sentence. Two max.

**Proof of Concept.** Show why they should believe you. (An achievement, an endorsement - something legit).

**Point B** – Remind them where you're taking them and how much time you'll waste—I mean, need.

# STRUCTURE YOUR PRESENTATION

## Step 5

## Structure your presentation

### 5B Body

This is where you actually present your content. Make it flow, make it clear, and don't bore them.

# STRUCTURE YOUR PRESENTATION

## Step 5

## Structure your presentation

### 5C Summarize

Quickly remind them what you just told them. (Because half of them were probably zoning out).

# STRUCTURE YOUR PRESENTATION

## Step 5

## Structure your presentation

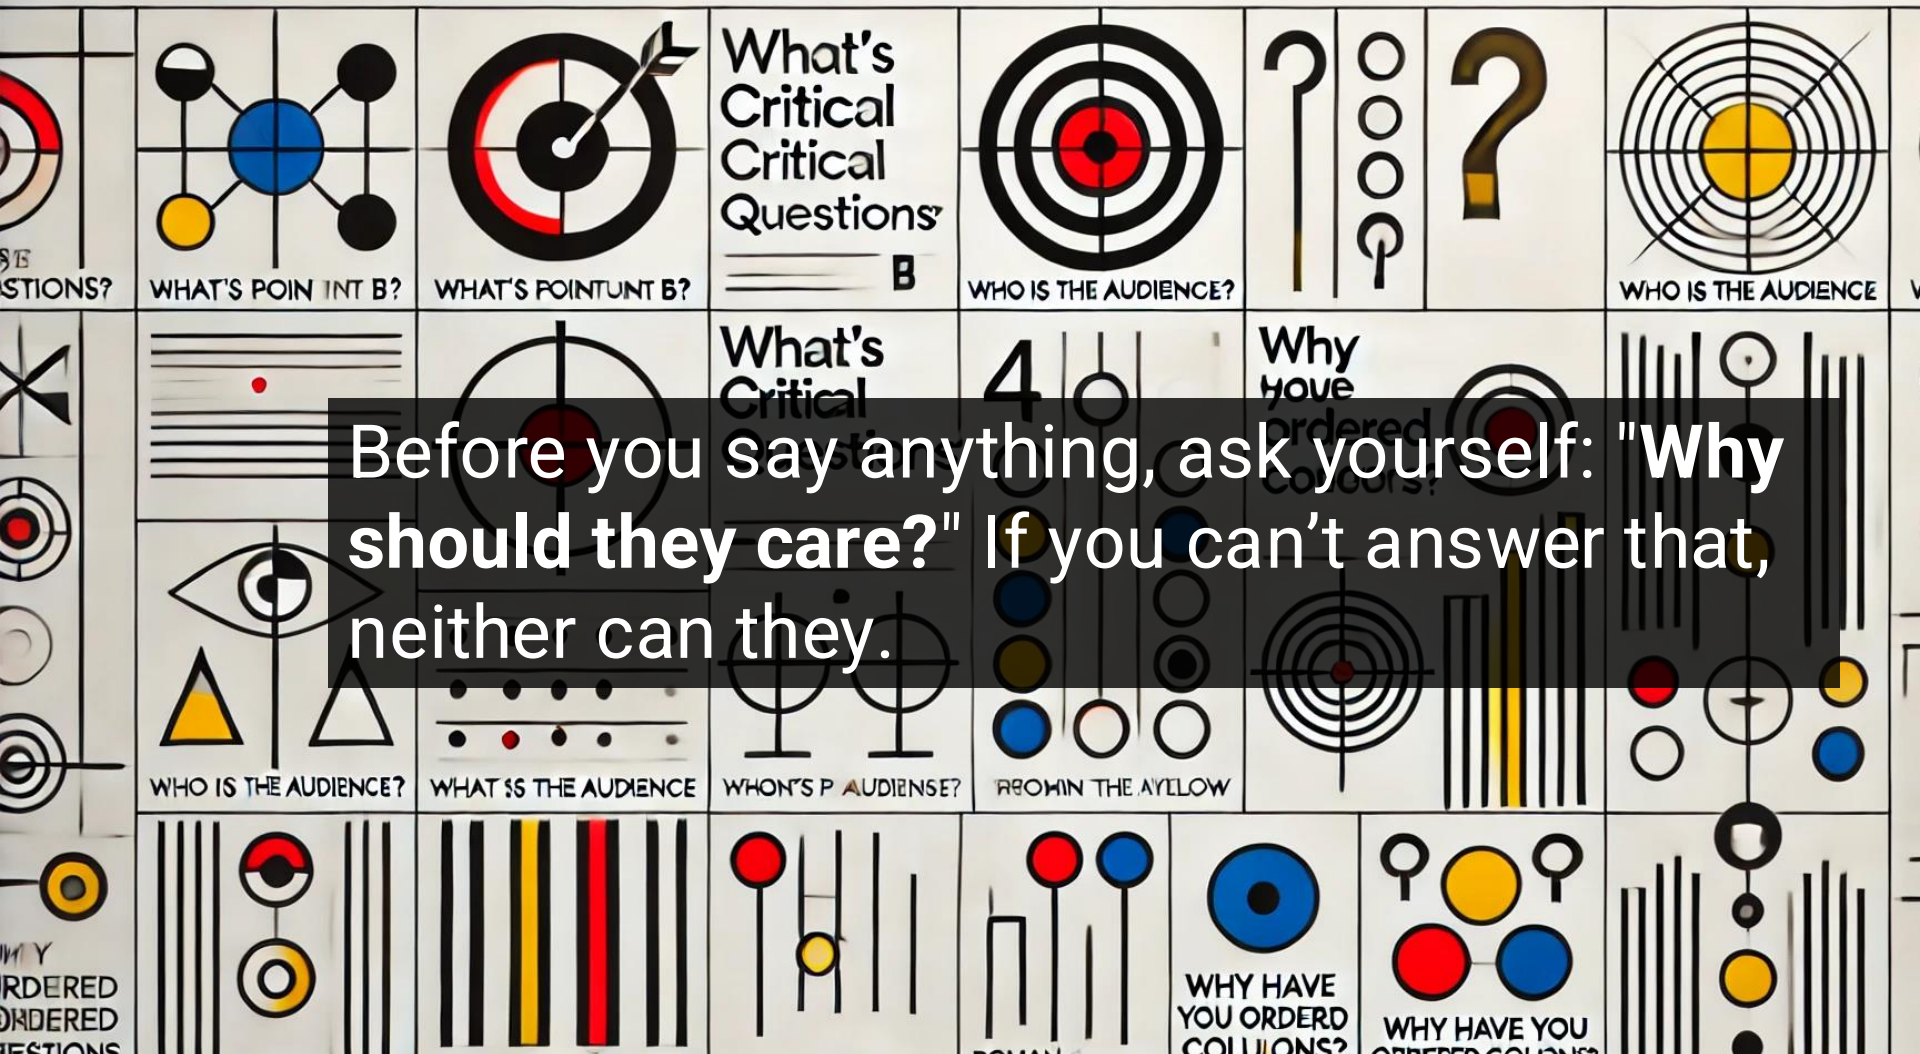

### 5D Last Words = Point B

End with your call to action.  
What do you want them to do,  
think, or remember?

# Before presenting, ask yourself 4 questions:

- 1 What's Point B?
- 2 Who's Your Audience & What's Their WIFY?
- 3 Do your main points stand strong like Roman Columns?
- 4 Did you structure your points logically?

What's  
Critical  
Critical  
Questions?

===== B

WHO IS THE AUDIENCE?

What's  
Critical

Why  
Have  
Ordered  
Colors?

WHON'S P AUDIENSE?

REBOMIN THE AYELLOW

WHY HAVE  
YOU ORDERD  
COLLIONS?

WHY HAVE YOU  
ORDERED COLLIONS?

Before you say anything, ask yourself: "Why should they care?" If you can't answer that, neither can they.
